

SECRET

CONTACT REPORT

PROJECT: CADROIT

TIME AND DATE: 21 May 54 1730-2130

PRESENT: CARBOHYDRATE and []

PLACE : CARBOHYDRATE's home

1. CARBOHYDRATE was questioned concerning the possibility that one of the persons connected with the CADROIT files might be a low level Soviet agent, developing low level info for the East. CARBO immediately ruled out several of the persons who are personally responsible for what is considered as "high level" i.e. highly classified information such as the MA files. ~~Excluded~~ If these persons were doubles, the information they developed would probably not be considered as low level. However, all in all, there are ten persons who could be considered as being engaged in work connected with one of the files in CADROIT. They are: Heynen, Hempel, Rosenberg, Friedrich, Steinicke, Reinsch, Schiller, Hesse, and Richard Haertal. (Note: As soon as we receive the original dispatch, we will send a tracer and start a special investigation on the matter. Apparently [] has the original dispatch and altho [] has requested a copy, one has not been forthcoming as yet. I would also like to query the original source of this info concerning certain details so that we can pin down the logical suspect a bit more.)

2. CARBOHYDRATE raised the matter of whether certain of these persons, such as Heynen, get paid enough so that they would not be particularly susceptible to bribery.

3. CARBOHYDRATE mentioned that Dr Wolff previously (during the war) worked for British Intelligence when in the East. He also was a member of the partisan fighters (Tito's side) in Yugoslavia during the war. After WW II, he worked as a Pförtner in a hotel in Lins, Austria. There is no apparent intelligence connection today and Wolff freely speaks about his former connections.

3. The matter of the recent ZIPPER arrests were also discussed with CARBOHYDRATE. He expressed fear that ZIPPER was endangering many persons needlessly. CARBOHYDRATE was cautioned to be particularly careful in observing for intelligence cross-connections in CADROIT, bsw. attempts by ZIPPER, the British, French or any other organization to develop CADROIT staff members into agents. CARBOHYDRATE was directly asked if he were a member of ZIPPER and he stated emphatically that he was not and that his only contact with any other intelligence agency was that which he has had with Galinot of the French, and that the latter had never made an effort to recruit him.

4. CARBOHYDRATE submitted several reports of SSD interest which have been forwarded to CART.

NEXT MEETING: 25 May 54
